

ALMANAC INDEXES
1973-2006
Subject-Author-Species/Hybrids

In the Fall of 1999, when Steve Taniguchi became the Editor of SPCNI, he began to create an index by issue. We have updated the index by Subject as well as by Author.

I then began pondering the idea of indexing the species and hybrids after assisting Rodney Barton create the SIGNA Indexes. This project sat in the back of my mind for a very long time as I didn't know how to begin, having had no experience with Excel. After conquering that hurdle with help, I began to pour through the Almanacs, one by one, notating the issue and page numbers. I may have entered species or hybrids that weren't very pertinent but I decided, how was I to know what was important to someone else.

Thank you to Jean Witt and Debby Cole for answering my questions concerning species. Kudos to Patti Lewis for helping me with problems I had when learning Excel and, of course, to my husband Jay for helping me begin learning Excel, transferring it to InDesign so that it could become a pdf for you to print. Thank you also to Steve Taniguchi for keeping the Almanacs Indexed by Subject through 2001. We plan to update the Indexes every five years.

Notes for the Species/Hybrids Index:

1. "S" is for the Spring Issue, "F" is for the Fall Issue.
2. For readability purposes, the var. or ssp. has been deleted with the species. The varietal or subspecies are in italics.
3. When two or more pages of an article mention a species or hybrid, the page numbers will read as in this example: 6-8. If there is more than one entry of an iris on a page, the page number is listed once only.

Index:

Indexed by Subject: pages 3 - 17

Indexed by Author: pages 18 - 33

Indexed by Species/Hybrids: pages 34 - 50

I hope that this indexing will be helpful to you.

Terri Hudson
